PART 7: ARISE, KILL & EAT!

THE HEALTHCARE INDUSTRY

The largest money maker in the United States is the healthcare industry. It generated \$3.24 trillion in 2015 and it is projected to rise to \$3.78 trillion in 2016. In order for you to understand the enormity of healthcare, compare it to the federal budget for the United States which was \$3.8 trillion dollars or 21% of the gross national product (GDP) in 2015,

The pharmaceutical industry is a colossal giant with sales from its ten top companies averaging \$3.98 trillion per year, which is larger than the federal budget for the United States. When there is that much money at stake, these greedy corporations and hospitals will assert tremendous pressure on the lawmakers and government agencies that regulate them. It is a well-known fact that the Federal Drug Administration (FDA) is a revolving door, where regulators are hired from the pharmaceutical industry, and when they stop working for the federal government, they go back to work for the pharmaceutical corporations.

Does anyone really believe the public is being protected? No, it is the pharmaceutical corporations which are being protected from the people they are poisoning. These corporations have also been waging war on the vitamin and health food supplement industry since 1945. Healthy people do not frequent hospitals and buy drugs and are therefore a threat to the healthcare industry.

WHY DO PEOPLE GET SICK?

People can become sick for many reasons such as accidents, man-made toxins, illegal drug abuse, a promiscuous life style, smoking tobacco, drinking alcohol, etc. However, I would say that the majority of people get sick from the food they eat.

During the 19th century there was very little food made in factories and people bought the raw ingredients and food was cooked in the home. Today most people eat processed food, meat loaded with hormones and antibiotics and genetically modified vegetables and fruit. Processed food and drink is saturated with white sugar and enhanced by agents like MSG, sweetened with artificial sweeteners like Aspartame or Splenda (sucralose). All artificial sweeteners are synthetic and harmful to the human body.

It is obvious that people living on a diet of poor food will get sick; it is just a matter of time and the strength of the body to sustain a diet filled with harmful things.

GOD'S DEFINITION OF FOOD

Did God create all things to be food? No, before Adam and Eve sinned, they and all the animals were vegetarians. **Genesis 1:29-30**

After Adam and Eve chose to sin, the entire earth was contaminated and some animals became carnivores. **Romans 8:19-22**

God was not surprised by the fall of Adam and Eve and knew the outcome before the creation of the universe. God had prepared certain animals, birds and fishes that could be eaten and ingested by man without getting sick.

THE LAW OF THE BEASTS AND THE FOWLS

When God gave the laws to be written down by Moses, they were divided into three categories:

- A. The Moral Law
- B. The Practical Law
- C. The Sacrificial Law

Only the Sacrificial Law was fulfilled by Jesus and is not in existence any longer. The other two laws still stand because God wants to protect His children from being contaminated with toxins that cause sickness and an early death. The Law of the Beasts and Fowls is found in the book of Leviticus.

1. Pre-amble **Leviticus 11:1-3**
2. Listing of animals **verses 4-8**
3. Listing of fish **verses 9-12**
4. Listing of birds **verses 13-20**
5. Insects **verses 21-25**
6. More instructions on what not to eat and how to handle utensils that have come in contact with the flesh from dead animals. **verses 26-40**
7. Snakes and insects are not to be eaten. **verses 41-43**
8. God finished instructing Moses by stating that He is Holy and that the children of Israel should also be holy. He clearly stated that this was not a suggestion but a spiritual law that governs what mankind can and cannot eat. **verses 44-47**

The following popular foods are not on God's food list: Pig, shrimp, lobster, crab, crayfish, abalone, oysters, catfish, eel, shark, sturgeon, rabbits, etc.

EVERY FOOD IS CLEAN NOW

Some people think that Jesus did away with the food laws and will often point to Peter's vision in the Book of Acts to support their theory that all food can now be eaten. On the contrary, Jesus stated that the Moral and Practical Laws will continue to stand until the universe is dissolved. **Matthew 5:17-19**

What about Peter and the great sheet full of all kind of animals and creeping things as described in the Book of Acts? An honest reading of this account shows that God was teaching Peter a lesson, declaring to him and other Jews that Gentiles also had souls and could be saved. Jesus died for everyone on earth, not exclusively for the Jews as they thought. **Acts 10:1-48; 11:1-18**

Other people will point to what the apostle Paul wrote to Timothy as further proof that we can eat whatever we want but a more careful reading of the text shows that Paul is only referring to foods that God has created to be eaten. **1 Timothy 4:1-5**

If you don't know what foods Paul had in mind, please see the eleventh chapter of Leviticus and then read what Paul wrote with perfect clarity.

CONSEQUENCES OF BREAKING THE FOOD LAW

What happens when a Christian breaks the food law? First of all, you and I are not born again by keeping the food laws and so it is impossible for a person to lose his salvation by failing to obey the food laws. However, there will be consequences that may take time to manifest:

1. You put yourself under the curse of God. **Deuteronomy 28:13-15**
2. The toxins in the food will cause sickness in your body. **Galatians 6:7-8**

CONCLUSION

It is commonly accepted by people today that smoking tobacco will eventually cause cancer. It is also commonly accepted that prolonged use of alcohol will cause liver and brain damage.

With all that science has revealed, why are Christians void of understanding when they know that artificial flavors, artificial colors, artificial sweeteners, hormones and antibiotics cause cancer in mice will do the same to human beings?

If God took time to have Moses write down precise food laws, why do Christians dismiss them today? All the forbidden animals are toxic; they always have been and always will be. Why would you want to put something toxic into your body?

The Devil and his demons want you to break God's food laws in order to give them the legal right to place demons in you.

The healthcare industry wants you to break God's laws so you can fill a hospital bed and give your hard earned money to them.

The pharmaceutical industry wants you to break God's laws so that they can sell their drugs and take the rest of your hard earned money.

The government of the United States wants you to break God's laws so that your life will be shortened and they won't have to pay out Social Security benefits to you.

Who are you going to please? Are you going to be smart or stupid? Will you obey mankind or God?

Remember, it's not so important how you begin your life after salvation, but how you finish it!

Do you have an ear to hear with?
